

*Welcome to
Bauleni
Special
Needs
Project*

A Bauleni Student won top prize in a UN inter-school competition. Above, she reads to us, so clearly, the composition that won her the prize, her dream for her future. All received school bags & t-shirts.

Yvonne on the left is a former Teaching Assistant who has just completed her Special Needs Teacher Training, courtesy of Misesan Cara for her last two years. Mary, on the right, is a Teaching assistant, who has been in this role from the beginning of the Project . . . & is also Yvonne's Mother.

Installing Solar Power

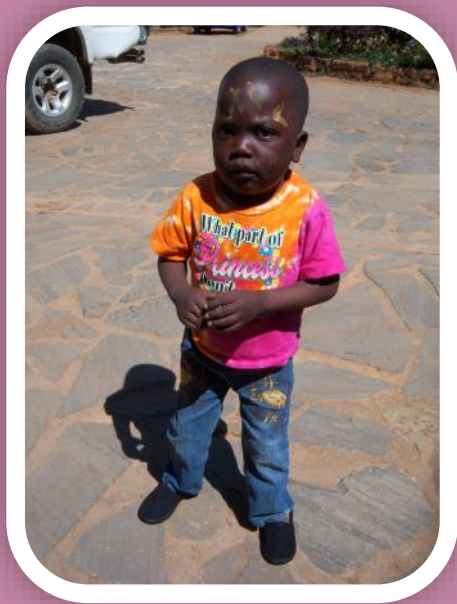

The batteries and Inverters
and the UPS's are all now on
shelves made by the carpentry

Taking the cables across to
the Admin Office from the
UPS on the left, enabling all
Admin work to continue
during outages. This set
powers the whole office area
For Director, Accounts, Head,
Deputy Head and Admin
offices. The set above is in
the Pre-school.

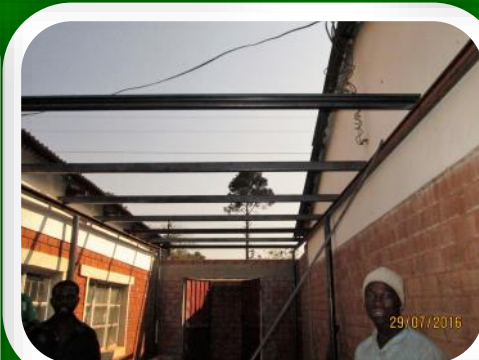

Most of our children are dressed in clothes we have received as 'in kind' donations, some from local people in Lusaka, others primarily from the north of England.

Some of
our
special
students

Creation of the Feed Shop

The space between the shop and classrooms has been utilised for the Animal Feed Shop. The space hold many more bags than we could keep in the shop.

The vacated space is now a café within the shop

Without Bauleni Special Needs Project, these children would not be in school and would have no social interaction with others. Absom is a severe epileptic. Jessie almost died several times of diabetes before we took her into the school. Now she has learning difficulties, but she is blossoming. Jerry had never been off his back before he came to the project at three and a half. Now he has started walking and is toilet trained. Lilian communicates only through her eyes and her smile (or tears) but we used a system with her using her eyes that enabled her to sit her grade seven exam. Frank has Downs Syndrome and learning difficulties but he enjoys learning and very much enjoys being with others.

As it was after the Feed was removed.

**Early developments
of the Café in the
shop.**

There is still a lot of
work to do to
brighten the café
area but it is taking
shape.
